

CERTIFIED FIBER OPTIC TECHNICIAN (CFOT)

Certified Fiber Optic Technician (CFOT) is the Fiber Optics Association (FOA) certification for general fiber optics applications. CFOTs have a broad knowledge in fiber optics that can be applied to almost any job (design, installation, or operation) - for almost any application (outside plant, premises, manufacturing, etc.) This course prepares you for the CFOT exam with extensive classroom and practical hands on experience. The cost of your first exam sitting (conducted at the end of the course) is included in the course tuition.

CNC is certified by the Fiber Optic Association to provide Certified Premises Cabling Technician and Certified Fiber Optic Technician courses. We are also pleased to adjust our training to the specific needs of your organization as well as host on-site training at your convenience.

Prerequisite(s)

None

Textbooks required
