# **Winter 2018 – FSR ELECTRICAL CODE COURSE**

## **Course Description:**

**This electrical code course is specifically designed for journeyman electricians that are preparing to write the Technical Safety BC - "B" Field Safety Representative (FSR) certification examination and those wishing to update their current electrical code knowledge.**

**Individuals interested in writing the “A” – FSR exam will be provided with additional code reference materials, work sheets and a mock “A” exam in preparation for writing the Technical Safety BC “A” - FSR exam.**

**4<sup>th</sup> year electrical apprentices are also eligible for taking this course.**

## **Course Content:**

- **2015 Canadian Electrical Code (44 sections of the BC Electrical Code)**
- **BC Amendments, Electrical Safety Regulation, Safety Standards General Regulation, Safety Standards Act, and the Electrical Fee Schedule**
- **Electrical Directives, Information Bulletins and Safety Orders**
- **National Building Code (BC Building Code) as applicable**
- **National Fire Code as applicable**
- **ULC Fire Alarm Systems standards as applicable**
- **Various CSA Part 2 Electrical Equipment construction standards as applicable**

**This code course offers a unique perspective from an electrical safety officer’s 26 years’ experience as an electrical safety officer and 42 years combined experience in the electrical industry. The course is primarily designed to provide students the required knowledge for successfully writing the TSBC – FSR exam but will also impart significant “real life” practical electrical knowledge, examples, experiences, insights and identity common non-compliances, that will enhance the value of the code and be useful for day to day applications for electrical workers.**
